Skills

- I have been programming for the past seven years. I am self-taught in my knowledge, but have also taken classes for my abilities to be recognized.
- I am a programmer who works in C++ almost exclusively, but I have used other languages like Python, C, Rust, GLSL, and C# to name a few.
- I have made rendering engines in OpenGL and in Vulkan, both with VR support through Valve's OpenVR API.
- I am dedicated to my work, and to learning as much as I can.
- I am able to speak passable Spanish.

Experience

September 2018 - November 2018

Election Campaign Clerk

- Conducted research of constituent moods and assisted in internal office assistance work, such as paper filing.
- Handled phone calls, as well as calling constituents for polling and informative purposes.

September 2018 - Present

Tutoring

- Tutored students across various subjects to increase their proficiency and reduce fear of failure.
- Answered questions via email, text, and video calls.

September 2018 - Present

Library Volunteer

- Participated in the creation and execution of many library programs through my position on the Teen Advisory Board. Also volunteered at such events.

Education

Saddleback Community College

I have taken several classes at the community college while also enrolled in high school. I have earned 13 credits as of this point, including Comp-Sci classes to confirm my skills.

Capistrano Valley High School

Currently a Junior enrolled in Capistrano Valley High School, to be a Senior in the class of 2022. Part of ATMS, the International Baccalaureate program, NHS, Principal's Advisory Council, among others for academic and school programs. I am at the top of my class, earning the Superintendent's honor roll every semester and holding a 4.625 GPA.
